Employees

150 employees, 47 SAP Business One users

Reasons for choosing SAP

During the last years, we had various data replication issues caused by our other in-house solutions. When looking for a solution we found the Intercompany Integration Solution for SAP Business One.

This solution enables us to share our financial data, chart of accounts, master data and other related financial objects among the four companies in our group.

Key benefits

- With the mapping of all our objects (Group of items, Business Partners and others) we have a unique and complete master data base.
- Lego is part of a holding with four companies, which need to be tightly integrated with each other, there is huge demand for different business scenarios. With the Intercompany Integration Solution for SAP Business One we now have the capability to build and adapt scenarios quickly.

Customer quotes

"The SAP Business One intercompany integration fits to our main need (master data replication)

The solution offers the possibility to consolidate our financial data from the four companies in our holding group and build as well as change different business scenarios, according the specific needs "
